

AUDIT ANALYTICS SOFTWARE

CashFlow Guardian (CFG) audit analytics software, developed by auditors and software programmers with over 50 years of experience in data mining and analysis, can be applied to a wide range of organizations from retail to large health care entities.

CashFlow Guardian was designed to identify processing errors and overpayments and verify compliance with contracts, policies and procedures and regulatory guidelines. We understand business needs and respond quickly by providing high-quality consulting and support when needed.

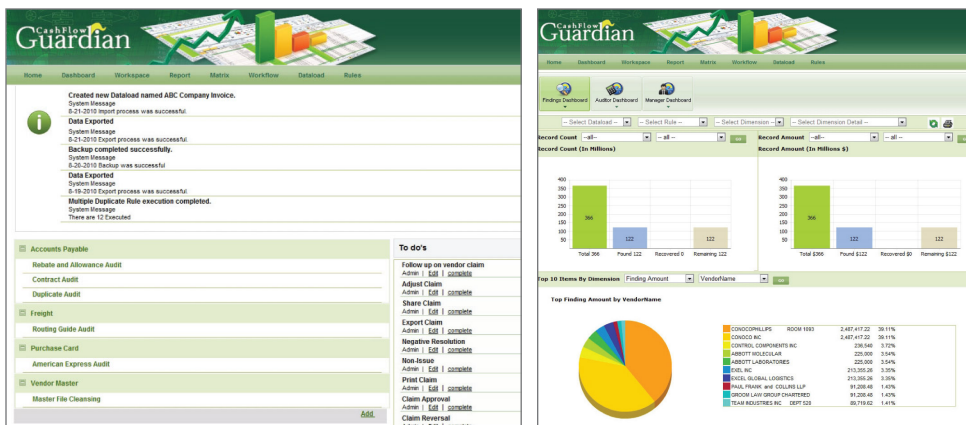

CashFlow Guardian's features (see sidebar) are much more robust than other products currently on the market which results in savings of both time and money. We have a proven track record with Fortune 500 companies. CashFlow Guardian utilizes sophisticated business rules and analytic capabilities to improve decision making and financial performance. It is designed to reduce false positive findings and is developed with state-of-the-art technology.

CashFlow Guardian easily processes large data sets, defines data relationships and views, and flags problem transactions. By automating the analysis process from identification to resolution, CFG provides continuous monitoring of data, defines workflow, and automates manual tasks.

CashFlow Guardian is a web based application hosted in a SAS 70 Type II and PCI DSS compliant environment that includes continuous monitoring capabilities for real time data analysis.

CashFlow Guardian's Vendor Portal displays claims/chargebacks generated during the audit process. Vendors can view and print the claims and supporting documents marked as public in CashFlow Guardian.

Example Screens

CFG ADDRESSES
